

CANADIAN COINS 101

A coin course for kids only, *not adults*

This coin course was designed by a long time coin collector. He was requested to talk to a group of students about coins and found that there was not a beginner's coin course available in Canada or the U.S. This encouraged him to gradually expand his initial coin course and he decided to do several things that had not been tried before.

- a) It was decided to supply a Canadian coin that corresponded with the study of that particular coin. For instance, when Canadian large cents were studied, the students were given a large cent along with instructions how to mount it in the 2" X 2" holders.
- b) Each answer page also had some coin humour to amuse the student.
- c) The lifelong experiences as a coin collector have been included to help avoid the inevitable mistakes of the novice collector such as bidding at coin auctions, coin grading, coin prices, etc.

Canadian Coins 101 is supported financially by both **The Royal Canadian Numismatic Association** and the **Ontario Numismatic Association**. The present enrollment fee only partially covers all the extras in this coin course. Also this collector has contributed his time and efforts at no cost to the course.

Listed here are some of the items included in this unique coin course:

Three ring binder with over 100 pages of coin related information. - Textbook on Canadian Coins. - Generous supply of 2" X 2" coin holders. - Fifteen plastic pages to hold the 2 X 2s. - Sixteen out of circulation Canadian coins for the first set of questions. - Powerful magnet to determine steel coins. - Self addressed envelopes for sending in the answers. - Correction service for the answers. - More coins for the second set of answers. - email address for inquiries.

If by chance you do not hear from us in 7 days, then email us coinkids@execulink.com and we will get you immediate action.

Cut along here and keep the top part for your records
